6 **Contact**
How to reach us

01

About *us.*

Who we are, where we work and the numbers behind us.

WHO WE ARE

A young company, built for *what comes after the template.*

DataDropX was founded in November 2025 in Dhaka, Bangladesh, with an office in Malaysia. We design and build websites, custom software, mobile apps and AI automation.

Then we help each product grow, with SEO, analytics and ongoing support from the same team.

FOUNDED	HQ	OFFICE
Nov 2025	Dhaka	Malaysia

BY THE NUMBERS

Results clients *can point to.*

30+
Projects delivered

5+
International clients

3+
Countries served

98%
Client satisfaction

Bangladesh, Malaysia and the USA. The same figures appear on datadropx.net.

02

Our *capabilities.*

Services, AI automation and the industries we build for.

SERVICES

Six service lines, *one team.*

Web and e-commerce

Fast websites, online stores and marketplaces.

Custom software

ERP, CRM, dashboards and client portals.

Mobile apps

iOS and Android apps with a real backend.

AI automation

Assistants, agents and LLM workflows.

SEO and digital growth

SEO, GEO and AEO, ads, analytics and CRO.

MVP and retainer teams

Fast first versions and ongoing product support.

WEB AND E-COMMERCE

Sites and stores *built to convert.*

Fast, search-friendly websites and online stores, from a brand site to a multi-vendor marketplace, with checkout and payments ready for orders.

Best for: Businesses launching or rebuilding a website or online store.

- Responsive design and build
- Product, checkout and payment setup
- On-page SEO and structured data
- Speed and Core Web Vitals tuning

E-commerce development

Retail and e-commerce

Related work: Sundoritto, 15K+ orders across 2K+ products.

CUSTOM SOFTWARE

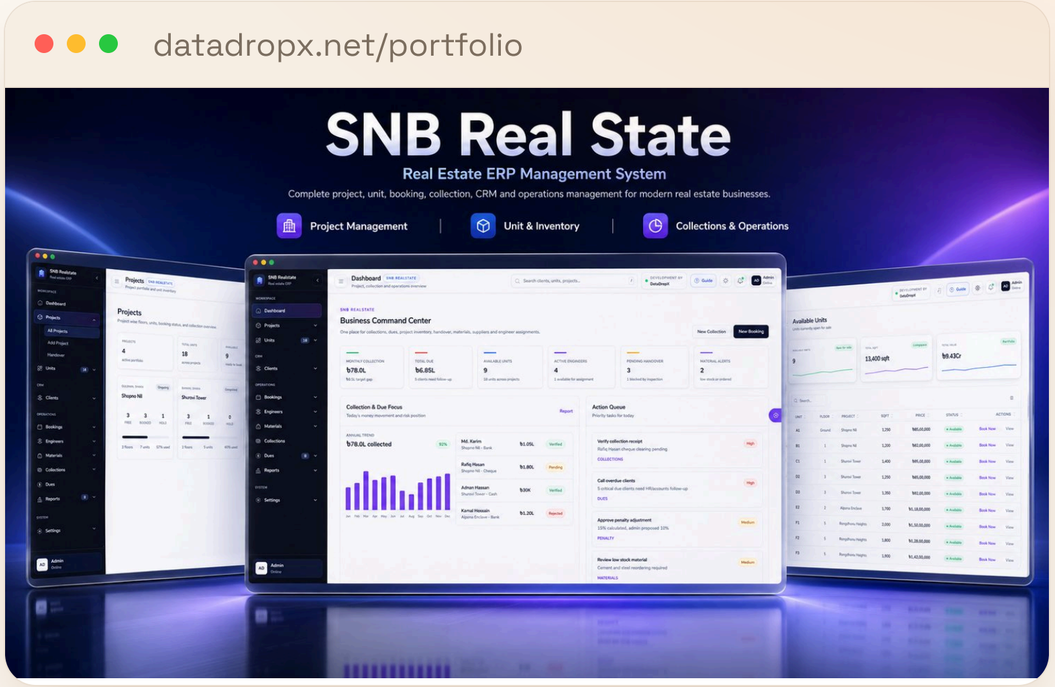
Business systems *shaped around you.*

ERP and CRM systems, dashboards, client portals and cloud-ready platforms, with the backend and APIs built in.

Best for: Companies running on spreadsheets or tools that no longer fit their process.

- Discovery and a scoped plan
- Role-based access and workflows
- Reports and dashboards
- Deployment, handoff and support

Custom software | ERP and CRM | SaaS



Related work: SNB Real State, 2K+ properties managed in one ERP.

AI AUTOMATION

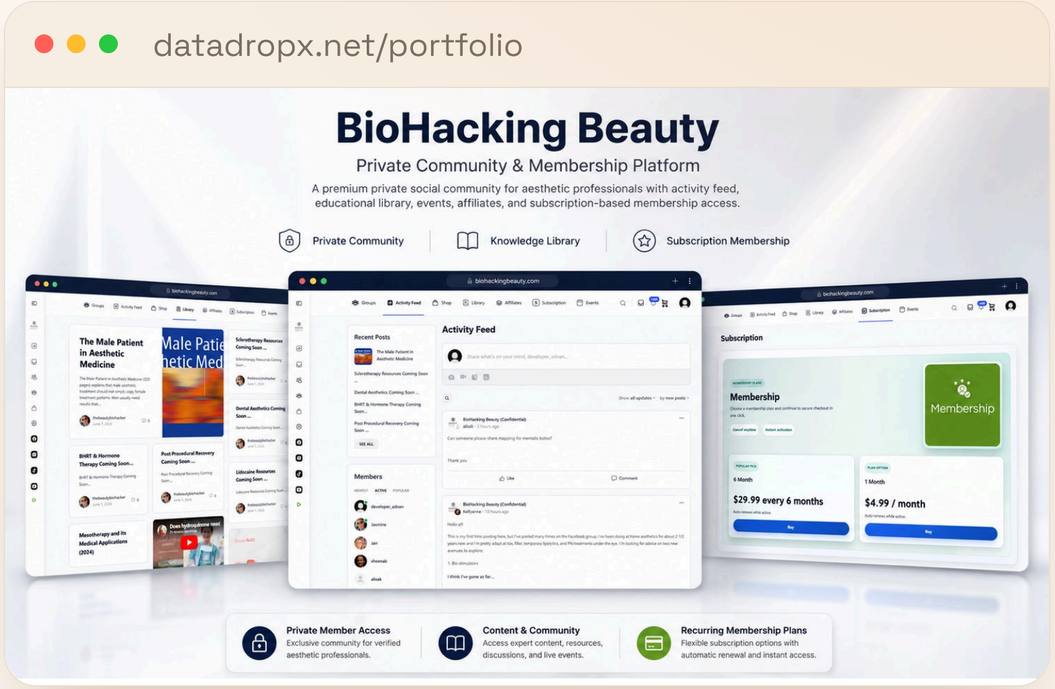
AI that takes work *off your team.*

AI assistants, agents and LLM workflows added to the tools a business already uses, with approval steps where they matter.

Best for: Teams buried in repetitive tasks, support questions or manual data entry.

- Workflow audit and priorities
- AI assistants and agents
- Tool and API integrations
- Testing, guardrails and handoff

AI automation | AI agents | Workflow automation | LLM integration



Related work: AI skin analysis at Biohacking Beauty, AI matching at Hustle Hopper.

SEO AND DIGITAL GROWTH

Found in Google, *quoted by AI.*

SEO, GEO and AEO to be found in Google and in AI answers, plus ads, analytics and conversion work to turn visits into leads.

Best for: Businesses with a website that want more qualified visitors and clearer reporting.

- Technical audit and fixes
- Content and schema markup
- Conversion tracking and dashboards
- Monthly reporting

SEO, GEO and AEO

Growth engineering

Conversion optimization

Related work: Kwikey, 35% visitor-to-lead conversion and 200+ leads a month.

ALSO ON OFFER

Mobile apps, and *teams that stay.*

Mobile apps

iOS and Android apps with a real backend, for customer experiences, internal teams and booking flows.

- React Native builds
- UI and UX design
- API and admin dashboard integration
- Store release support

MVP and retainer teams

Focused MVP sprints to get a first version live, then ongoing support to keep improving after launch.

- Scoped MVP with clear priorities
- Weekly delivery and a shared roadmap
- Maintenance and performance care
- Dedicated team that scales with you

INDUSTRIES

Six industries, *each with delivered work.*

Retail and e-commerce

MRSB Mart, Shikder Limited, Sundoritto

Real estate

SNB Real State

Corporate and business

ERP and operations systems

Marketplaces and booking

Hustle Hopper, Beat Retreat

Health and beauty

Sundoritto, Biohacking Beauty

Local services

South Shore Locksmiths, Kwikey

03

Beat Retreat	Business website	120+ artists, 50+ retreats
Biohacking Beauty	Business website	8K+ customers, 500+ products
Hustle Hopper	Business website	5K+ freelancers, 15K+ jobs done

04

Our *process.*

How we work, the AI tools we use and the stack we build on.

OUR PROCESS

From first call *to launch.*

01

Discover

A short call on the goal, the users and the limits. You get a scope, timeline and estimate.

02

Design

Flows and screens are agreed before development starts, so there are fewer surprises later.

03

Build

We ship in small, reviewable steps and keep you updated, with testing along the way.

04

Launch and grow

We deploy, hand over and stay on for maintenance, optimization and new features.

AI IN OUR WORKFLOW

AI-powered tools we use *in our working process.*

Claude

Research, Audit and Drafting

Turns briefs into structured findings, plans and documents.

Claude Code

Coding Inside Our Codebases

Helps us write, refactor and test code across our own projects.

Cursor

Faster Build Iteration

Speeds up debugging, refinement and handoff-ready front-end output.

Figma Make

Rapid Mid-Fi and Hi-Fi Iterations

Explores UI structure and prototypes faster.

Higgsfield

Motion and Video Assets

Helps visualize ads, storyboards and product moments.

Magnific

High-Resolution Images

Sharpens mockups and enriches imagery for polished presentations.

TECHNOLOGY

Development team *tech stack.*

Next.js	React	TypeScript	Tailwind CSS	GSAP	WordPress
Node.js	Express	Django	PostgreSQL	MongoDB	Redis
Prisma	Supabase	Stripe	Socket.io	Docker	Google Maps

Chosen per project, from tools used in delivered work.

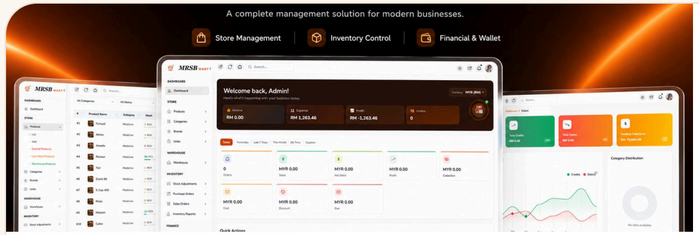
05

Working *together.*

Engagement models, starting prices and why teams choose us.

ENGAGEMENT MODELS

Ways to work *together.*



#1

Project basis

A defined build with a clear outcome, from a website to a full ERP.

- Fixed scope and pricing
- Clear timeline and milestones
- Full end-to-end delivery

#2

Monthly retainer

For products already live that need steady care and room to grow.

- Updates, fixes and monitoring
- Ongoing features and optimization
- Priority support

#3

Dedicated team

DataDropX engineers working as an extension of your own team.

- Shared roadmap
- Weekly delivery
- Long-term scaling

STARTING PRICES

Clear starting points *for every engagement.*

MVP Sprint

From

$1,500

A focused first version, ready to test. 2 to 6 weeks.

Custom software

From

$4,000

Business systems with a defined outcome. 4 to 12 weeks.

AI automation

From

$1,000

Assistants and workflows added to your tools. 2 to 6 weeks.

Maintenance, growth retainers and dedicated teams cover work after launch. Prices are starting points in US dollars; the final quote follows a short discovery call.

WHY DATADROPX

One team from *idea to growth.*

01

Build and grow together

The team that builds your product also handles SEO, analytics and conversion, so nothing is lost between vendors.

02

AI built in, not bolted on

Recommendations, matching and analysis already run inside platforms we have delivered.

03

Found by search and AI

SEO, GEO and AEO are part of how we build, so your site can be found in Google and quoted in AI answers.

04

Clear scope, support after

A written scope and timeline before we start, and maintenance or a retainer once you launch.

LET'S TALK

Tell us what *you are building.*

A short call is enough to get a scope, a timeline and an estimate.
